## PROJECTS

### CREATOR CLASS | DEC 2020 - MARCH 2021

- In this project, I have worked on two primary modules, creator and user.
- Where creator can create the live stream, classes, sessions and upload materials and multiple users can join the live stream and have a one-to-one session with the creator.
- I have used AgoraRTM for real-time messaging and AgoraRTC for real-time video calling with screen sharing functionality.

### REACT CHAT ROOM | JUNE 2020

- This project is developed with ReactJs, Html, CSS, JavaScript and NodeJs. Where I have used socket.io for client server communication. In this chatroom user can create room and invite friends to join. Multiple user can chat with emoji functionality. I have deployed the server in heroku and client app on the netlify. App is responsive for different devices with user friendly UI.
- Deployed APP : <https://rb.gy/cmvxj3>

### BURGERBUILDER | FEB 2020

- I have done this project to learn ReactJS. In this project we can add and remove ingredients in/from burger and according to that the price of burger will vary. After building burger, clicking on order button, order summary will generate and ask for user's details and it will keep track of orders in summary tab.
- Deployed APP : <https://goofy-swanson-75fb9a.netlify.app>
